

Rivers

- Roll 1: Absorbed by roots of plants
- Roll 2: Naturally flow to surface as springs
- Roll 3: Filter into lakes
- Roll 4: Remain in river
- Roll 5: Remain in river
- Roll 6: Remain in river

Soil

- Roll 1: bed by roots of plants
- Roll 2: Drain into river
- Roll 3: Filter through soil into groundwater
- Roll 4: Evaporate and move into clouds
- Roll 5: Evaporate and move into clouds
- Roll 6: Remain in puddle on soil surface

Groundwater

- Roll 1: Melt and filter into groundwater
- Roll 2: Evaporate and move into clouds
- Roll 3: Melt and flow into river
- Roll 4: Remain in groundwater
- Roll 5: Remain in groundwater
- Roll 6: Remain in groundwater

Plants

- Roll 1: Transpire from plants and move into clouds
- Roll 2: Transpire from plants and move into clouds
- Roll 3: Transpire from plants and move into clouds
- Roll 4: Transpire from plants and move into clouds
- Roll 5: Remain with plants-water stored in cells
- Roll 6: Remain with plants- water stored in cells
